Response to Arguments

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Therkorn. Therkorn discloses all of the limitations including a support for the hips 44 and upper section of the user's body (col. 3, line 11) but does not teach the lower section and upper section of the carriage pivotally attached to one another. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Therkorn such that attaching the two sections of the carriage to make one section, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art.

3. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 10-20 are allowed.
